-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

1. The drawings filed May 26, 2004 appear to be formal and are acceptable.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Plummer et al (CA '597) in view of Doerksen et al ('170).

The invention is substantially met by Plummer et al (CA '597) who disclose a method and apparatus for determining at least one coordinate of a movable sensor including, inter alia, a GPR system (15) in combination with an optical system such as FLIR (forward looking infrared) camera or video camera (see Figure 2). The system also includes a lane marking system 70. However, it appears that the Plummer et al (CA '597) does not show a positioning marker as claimed.

To this end, Examiner applies Doerksen et al ('170) to specifically show determining the position of a movable sensor including, inter alia, positioning markers (see paragraph [0016]). Doerksen et al ('170) also disclose various marker systems including a tape measure or marked string (see paragraph [0005]).

Thus it would have been obvious to one of ordinary skill in the art to modify the sensor system of Plummer et al (CA '597) by including the parker positioning system as taught and as motivated by Doerksen et al ('170) in order to improve the detection of underground objects.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited prior art show various radar systems.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John B. Sotomayor whose telephone number is 703-306-4170. The examiner can normally be reached on Monday to Friday from 8:30AM to 5:00PM.
